Top Security tips for Prompt Engineering

Dr. Reddy's

Avoid sharing personal information

Avoid including sensitive or confidential information, like names, addresses, contacts, or other identifying details.

Use Anonymized Data

Anonymize sensitive data to prevent exposure of personal info, by removing or disguising identifying details.

Be cautious with Business Information

Avoid including proprietary or sensitive business data like trade secrets or confidential company information.

Don't include Passwords/ security codes

Never share passwords, security codes, or other authentication credentials in prompts.
